

# Value-Based Care

## Overview

Transitioning to a value-based reimbursement model requires adjusting your workflows and adopting new, supporting technology.

Tegria is here to assist in implementing the necessary tools and operational strategies to support these new care delivery models that focus on proactive care management and risk-adjusted reimbursement contracts.

“

Their deep understanding of healthcare and electronic medical records has established them as a pivotal partner in our pursuit of a value-based care delivery model aimed at improving our community's healthcare services.

Tim Lee, MD, Physician Informaticist, AltaMed Health Service

## Solutions to Meet Your Needs

### Strategy Transformation

Drive change through governance strategies focused on monitoring performance, ensuring accountability, and adapting to changing conditions.

### Performance Monitoring & Improvement

Improve key performance metrics and create an actionable roadmap focused on immediate impact and sustained success

### Care Team Solutions

Embrace care coordination across the care continuum and empower care teams to adopt a more holistic, cost-efficient, and patient-centric approach.

### Data Aggregation & Application

Ingest data from external sources and calculate a variety of patient risk scores through the implementation of cognitive computing models and scoring systems.

### Patient Engagement

Develop tools and strategies to support proactive patient outreach to at-risk populations and empower patients to take a leading role in their wellness.

## Our Approach

## Anticipated Outcomes

### Improved Quality Metrics

Reduce your care gaps and address your payer requirements through the introduction of point-of-care insights.

### Enriched Program Insights

Take advantage of new analytics capabilities to examine KPIs like cost, utilization, and quality adherence.

### More Accurate Risk Calculations

Enhance your risk stratification capabilities through the ingestion of claims data and the implementation of new, advanced scoring models.

### Increased Workflow Automation

Efficiently perform proactive patient outreach with tools designed to streamline the process while prioritizing your work efforts.

### Increased HCC Compliance

Capture HCCs more consistently through enhancements to your documentation and claim review strategies.

### Increased Revenue

Boost revenue by identifying and implementing tools and processes designed to reduce costs and increase reimbursement.

Are you ready to transition or optimize your strategies for value-based care?
