Unlock Efficiencies With Comprehensive, Client-Focused Services

-  **Advanced Analytics**
We provide deep analytical expertise to convert your data into actionable insights and a competitive advantage.
-  **Strategic Data Management**
We integrate disparate data sources and create data pipelines to improve data exchange and create authoritative data sources.
-  **AI and ML Development**
Our certifications include artificial intelligence and machine learning to bring predictive power to your data.
-  **Insightful Reporting**
We craft enterprise reporting strategies that clarify which metrics drive value.
-  **Comprehensive Data Governance**
We establish the right data governance framework to ensure data integrity, security, and privacy.
-  **Cutting-Edge Infrastructure**
From data lakes to advanced ETL/ELT processes, we create robust data architecture optimized for healthcare's unique demands.
-  **Flexible Staffing**
We extend our team's expertise to fill your resource gaps to accelerate progress without the need for rapid internal hiring.
-  **Efficiency To Fuel Innovation**
Our solutions streamline processes, freeing up resources to focus on innovation and strategic growth.

Our Proactive Approach to Partnership

We immerse ourselves in your organization, aligning short-term wins with your long-term vision. Our approach is multifaceted, incorporating governance, development, literacy, and end-user adoption to help you master your data landscape.

You're Unique. So Are We.

End-to-End Healthcare Focus

Our end-to-end, healthcare-focused service model encompasses planning, technology selection, implementation, and ongoing support.

Certified Expertise

Our team boasts certifications in Epic Cogito, Azure, AWS, Databricks, Snowflake, and Power BI, ensuring top-tier skill sets for your projects.

Depth in AI and ML

With profound experience in NLP, AI, ML, LLM, and MLOps, we bring sophisticated analytical capabilities to your data challenges.

We needed somebody who knew the ins and outs of a certain platform to be able to get data in a certain fashion and then **transform the data** into a similarly complex format. That was a tall order with a lot of boxes to check, and **Tegria did what we needed phenomenally well.**"

Manager, September 2022, Technical Services, KLASresearch.com

Tegria's **analysts are really good**, and they advise us on how to build things and how the system functions. **They have helped with education guidance and hands-on building.**"

VP/Other Executive, January 2023, HIT Core Clinical Implementation Leadership, KLASresearch.com

Why Tegria?

With **1,500 healthcare-focused consultants** globally, we've helped **650+ clients** transform healthcare with market-leading solutions as a **top 10 firm** in seven KLAS categories.

Ranked #1 in Application Hosting
