

# Modern Data Platforms

## Scalable Cloud Solutions for Healthcare Data

Legacy systems cannot handle the increasing volumes of data healthcare organizations must manage, limiting scalability, driving up costs, and hindering innovation.

Healthcare organizations can break free from outdated, on-premises systems and unlock the full potential of their data with Tegria's Modern Data Platforms solution. By transitioning to agile, cloud-native architectures using platforms like Microsoft Azure, AWS, Google Cloud, Databricks, and Snowflake, organizations gain scalable solutions that improve data accessibility, boost performance, and lower costs.

By modernizing data environments, healthcare teams can harness real-time analytics, ensure compliance, and leverage generative AI to drive smarter decision-making and better patient outcomes. Tegria's expertise in data warehousing and advanced analytics equips organizations with a future-ready platform that fosters innovation, enhances collaboration, and accelerates sustainable growth.

**“Tegria has exceeded expectations** in modernizing our data platform. The transition to an Azure data lakehouse has been seamless, and the project was completed ahead of schedule. This allowed for additional optimizations and thorough training of our teams. **With Tegria's help, we have a scalable and efficient data infrastructure.”**

Dr. Charlie Sunday, Associate Chief Medical Information Officer, St. Luke's University Health Network

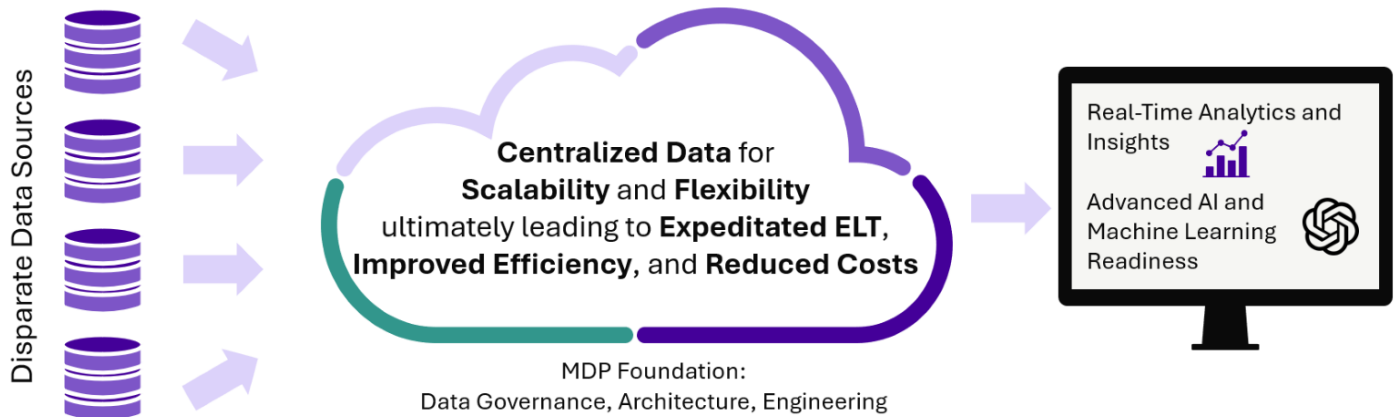

### We Help Clients Achieve

- Scalable, future-ready infrastructure
- Improved regulatory compliance
- Reduced operational costs
- Enhanced collaboration across teams
- Real-time data insights
- Accelerated innovation

### Leading Expertise That Bridges Healthcare Operations and Systems

- Deep EHR and healthcare expertise ensuring tailored solutions
- Proven integration capabilities with modern tools and platforms
- Real-time analytics expertise for timely decision-making

## Future-Ready Data Platforms for Healthcare

### Our Proven Path to Success

- **Assess:** Evaluate current infrastructure and identify opportunities for modernization
- **Strategize:** Develop a tailored cloud migration and analytics plan
- **Implement:** Seamlessly transition to a secure, scalable, and compliant cloud-native platform

### Why Tegria?

With **1,500 healthcare-focused consultants** globally, we've helped **650+ clients** transform healthcare with market-leading solutions.

**Ranked in the Top 5  
for Data + Analytics**
